

## StatBroadcast In-Arena Utility Configuration

1. Launch NCAA In-Arena Utility
2. Select your sport
3. Confirm IP address is set to localhost and Port is set to 7677
4. Click the Connections button in the lower left
5. Create a New connection and enter the following settings:

### NCAA LiveStats In-Arena Utility Settings ✕

If you will be using the IAU to transmit XML stats to StatBroadcast, please create a new connection and set it up as follows:

CONNECTION DETAILS

NAME: StatBroadcast TYPE: FTP

LOCATION: ftp://upload.statbroadcast.com

USER: statcloud PASSWORD: [REDACTED]

FORMAT: STAT CREW XML FILE NAME MODE: Custom File Name

FILE NAME: [REDACTED]

CANCEL ✕ SAVE ✓

In the File Name field, please use the filenames provided by StatBroadcast.

*Please note that each file name corresponds to a specific game and will need to be updated.*

**\*\*Don't forget to start the In-Venue feed (via the Settings menu) in NCAA LiveStats for each game. \*\***
